

Incontinence Bedding

The **Daltex® Aquashield®** range is a family of machine washable PP laminates comprising nonwoven spunbond and a high strength barrier film specifically designed for incontinence bedding and surface protection.

Designed with comfort, protection and low noise in mind, **Aquashield®** repels fluids providing a clean and hygienic solution to mattress and pillow protection.

Within the range the consumer can choose between the durable **Aquashield®**, **Aquashield® Active** incorporating a silver based anti-microbial or **Aquashield® Plus** incorporating a fire-retardant additive. **Aquashield®** is also available in a softer and vapour permeable polyethylene version under the brand **Aquashield® Soft**.

Wherever the application, **Aquashield®** is the perfect choice for mattress and surface protection especially in the home or hospital.
