

Don & Low | Artificial Grass

Don & Low
MEMBER OF THRACE GROUP

High-performance synthetic grass yarns

We understand that choosing the right grass yarn can have a significant impact on the final surface characteristics, influencing the overall performance, quality, and life expectancy of your sports pitch, landscape surface or synthetic grass application.

The synthetic turf industry is constantly evolving, challenging manufacturers to provide increased durability, resilience, and skin-friendliness. By applying over two centuries of textile and manufacturing experience, we've created DLG®, a unique and pioneering range of synthetic grass yarns which not only excel in terms of quality but also performance.

Through our carefully selected (and bespoke) polymers and masterbatches, our innovative DLG® grass yarns can combine aesthetics with the functionality to deliver long-lasting durability, improved resilience, softness and versatility.

In addition to our core range of DLG® yarns, we can also produce fibres to meet specific requirements, allowing us to achieve the desired performance criteria for your system, application or project.

Long-term Performance

Outstanding Durability

UV Resistant

Exceptional Resilience

Superior Skin-friendliness

Fire Retardant

Natural Aesthetics

Colour

Shape

We're not your average grass yarn manufacturer. We work with our customers to ensure we deliver the right yarn for your system and project, advising which fibre would work best meet your outlined requirements or objectives. Our technical team is at hand to provide the support or reassurance you need, whether you're a manufacturer, installer or end-user.
