Roll Out Rafter Tray

Datasheet

Roll Out Rafter Trays are a simple and effective way of preventing loft insulation from being pushed up to the underside of the roofing underlay, commonly blocking ventilation paths. Using Roll Out Rafter Trays will ensure a clear ventilation path into the roof void from the eaves to comply to BS5250. The width of the rafter trays must be chosen based on the thickness of the insulation being installed. They can be overlapped if different widths are required.

Guidelines

Roll Out Rafter Tray should be rolled out across the roof rafters, positioned where the roof insulation is to be installed and then screwed or nailed into each rafter to secure the component.

Specifications					
Product Code	DLRORT300	DLRORT400	DLRORT600	DLRORT800	DLRORT1000
Product	Roll Out Rafter Tray 6m x 300mm	Roll Out Rafter Tray 6m x 400mm	Roll Out Rafter Tray 6m x 600mm	Roll Out Rafter Tray 6m x 800mm	Roll Out Rafter Tray 6m x 1000mm
Material	HIPS				
Manufacturing Process	Vacuum Forming				
Weight	670g	894g	1,340g	2,140g	2,190g
Colour	Black				
Pcs / Carton	10	10	5	5	5
Cartons / Pallet	30	25	32	24	24
