

Don & Low Roofing Accessories

Eaves Comb (Bird Comb)

Datasheet

The Don & Low Eaves Comb (Bird Comb) is used to prevent birds and vermin from entering the batten cavity behind profiled roofing tiles, whilst allowing airflow. Available in 1,000mm length.

Benefits

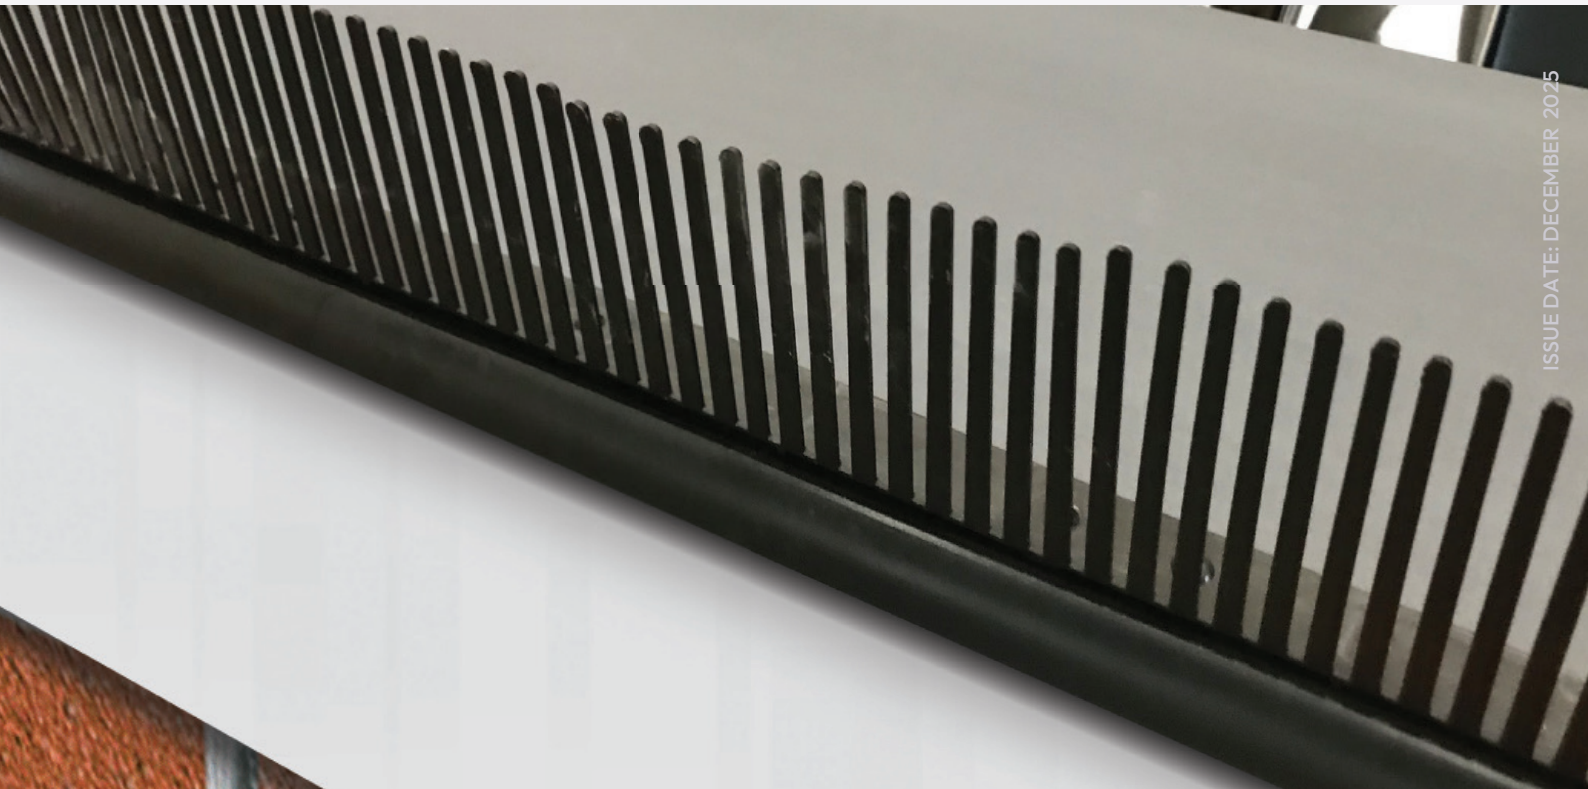

- ⊗ Prevents birds, rodents and other wildlife.
- ⊗ Provides airflow into the batten cavity.
- ⊗ Suitable for profiled roof tiles.

Guidelines

Place the Eaves Comb (Bird Comb) directly onto the eaves guard/felt support tray and mechanically fix with corrosion resistant nails (select type based upon the material of the soffit board e.g. timber or cellular), through the nailing holes. Fix through Eaves Guard i.e. 5U or Underlay Support Tray and additionally Fascia Vent if fitted into the fascia board.
